Thermo Repair Top UP

Application table

Flat ironing is an essential step that ensures that the substances contained in **Thermo Repair Perfect Ends And Thermo Repair Top Up** are heat activated. It must therefore be carried out while ensuring that the temperature of the flat iron remains stable over the entire surface of the plate throughout.
We recommend using the **J Premium** professional flat iron.

body, volume and thickness: fine hair

Shampoo	Mixing	Application	Processing time	Flat iron
Wash hair with Treasures Keratin Plus Shampoo	Prepare 35 ml of warm water in a bowl and add 5 ml of Thermo Repair Top Up using the syringe provided to extract it from the vial. Mix into a smooth mousse (in a ratio of 1:7)	Apply on damp hair with a brush, starting from the lengths. Apply strand by strand and massage gently, using a comb to remove any excess	Leave under a heat source for 15 minutes*. When processing time is up, rinse with cold water for 10/15 seconds	Blow dry hair completely using a brush. Flat iron hair. Adjust the heat to 170° - 200°, depending on hair type
