Oxilock Plasma Reset

Eliminates built-up toxins,
chemical residues and heavy
metals from the hair and scalp.

Benefits

Eliminates built-up toxins, chemical residues, heavy metals, resins and substances found in smog, in chemical treatments and in styling products, from the hair and scalp. Recommended as a cyclical detoxifying treatment for all hair types.

It is the perfect way to restore balance to hair and scalp before any type of treatment. It is ideal for anyone who uses chemical treatments such as permanent hair colour, toners and chemical straightening on a regular basis, or for anyone who uses hard water to wash their hair, frequents swimming pools or has stressand hair. Use as often as you like and before all chemical treatments. *It is safe and gentle, completely natural and contains no parabens, allergens, SLS, SLES or other harmful substances.*

– Treatment
Oxilock Plasma
Reset

step

step by step

step 1

preparatory shampoo

Wash hair with *Treasures Enhancing Shampoo*, rinse and towel dry.

step 2

reset treatment

Prepare *Oxilock Plasma Reset* pouring the contents of one sachet into a bowl (or into a bottle with applicator). Add 55 g of warm water and use a brush to mix thoroughly into a smooth gel. Apply the gel, massaging hair from root to tip to ensure optimal absorption throughout the lengths. Can be applied without wearing gloves so that your hands can also benefit from the treatment. Choose the processing time depending on the treatment aim on the condition of the hair: 10-15 minutes for light build-up / 15-30 minutes for medium build-up / 30-45 minutes for heavy build-up.

Cover with a cap and leave under a heat source. For maximum scalp benefits, apply starting from the scalp with a maximum processing time of 15 minutes.

step 3

final shampoo

When processing time is up, wash once with *Treasures Enhancing Shampoo* to eliminate built-up toxins and heavy metals from the gel and rinse thoroughly.

step 4

conclusion

Next, decide whether to use an acidifying mask and if so, choose the most suitable from the *Ocrys* o *Treasures*, lines. Leave on as required and then dry.

Alternatively, proceed with the planned chemical treatment using *Oxilock Plasma Miracle Come True* as directed.

Oxilock Plasma

Molecular repair with chemical treatments

Benefits

Oxilock Plasma is the exclusive complex of substances of organic origin. It replenishes keratin before, during and after aggressive chemical treatments. It restores hair healthy by improving its resistance to breakage and reducing damage (especially in “porous” hair that has been weakened or damaged by commonly used chemical treatments) without compromising the result of the chemical treatment. It does not require any additional steps over and above the traditional colour and bleaching service. When used as a repair treatment or alongside chemical treatments in line with the instructions, it multiplies the keratin bonds and improves and strengthens the disulphide bonds that were damaged during previous treatments. The quality and structure of the hair is visibly and instantly improved. It is safe for all types of technical work. The treatment simultaneously protects and prevents damage from aggressive chemical treatments.

Oxilock Plasma

Miracle N.1
Come True N.2

used with colour and bleach

Colour and bleach application table

Oxilock Plasma Miracle N.1* — *Oxilock Plasma Come True N.2
Oxilock Plasma is very easy to apply. For maximum efficacy, it is important that you dose the products using the measuring cup provided and follow all steps in the correct order. Mix the bleach and developer or the colour and the developer. Use the measuring cup to add the required amount of ***Oxilock Plasma Miracle N.1***, and then mix everything together.

Type of treatment	<i>Oxilock Plasma Miracle N.1</i>	<i>Oxilock Plasma Come True N.2</i>
Superlightener and colour service (Demi-permanent and permanent colour)	1 ml of <i>Oxilock Plasma Miracle N.1</i> per 20 ml of <i>Doc Color</i> or <i>Color Juice</i> (do not include the developer in this calculation). Example: 60 gr of color plus activator (when required by the coloring system used) + 1 measuring cup of <i>Oxilock Plasma Miracle N.1</i>	about 20 ml of <i>Oxilock Plasma Come True N.2</i> in medium-long hair. Apply to lengths and ends only as the last step at the end of the technical service, without shampooing hair first. Leave on for a minimum of 10 minutes, as required. Rinse and continue with the most suitable Jean Paul Mynè cosmetic treatment.
Bleaching*	1 ml of <i>Oxilock Plasma Miracle N.1</i> per 10 g of <i>Frozen Deco / Doc Powderdec / Doc Oleodec</i> (do not include the developer in this calculation). Never prepare more than 35 g of bleach in the same bowl as <i>Oxilock Plasma Miracle N.1</i> . There is no need to increase the volume of developer.	Rinse and pass to the next chemical service necessary, continuing to use <i>Oxilock Plasma Miracle N.1</i> within the product. If the service is completed apply about 20 ml of <i>Oxilock Plasma Come True N.2</i> , leaving on for 10 minutes. Proceed with the cosmetic treatment Jean Paul Mynè desired.

* N.B
Never use more than 3.5 ml of ***Oxilock Plasma Miracle N.1*** (one measuring cup)
Oxilock Plasma Miracle N.1 may slightly increase the processing time.

Oxilock Plasma

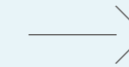

Miracle N.1
Come True N.2

used with perms

Oxilock Plasma can also be used to protect hair during a perming service, using a standard or tailored formula as set out in the table below.

Standard formula

Add one scoop of ***Oxilock Plasma Miracle N.1*** to the perm neutraliser (100 ml). Process for the required time. Rinse off the neutraliser, apply about 20 ml of ***Oxilock Plasma Come True N.2*** and continue with the next step as required by the type of perm used.

the expert's tips

During bleaching

You should follow the standard precautions for bleaching services, keep an eye on the processing time and check progress.

Heat does not cause problems with ***Oxilock Plasma***, however you should check every 3 to 5 minutes as normal. If hair is extremely damaged, do not use heat. This will allow ***Oxilock Plasma Miracle N.1*** to deliver maximum repair.

If you need to tone hair after bleaching

After bleaching, rinse hair and wash with a light shampoo. Continue with the next technical service and always use ***Oxilock Plasma Miracle N.1*** in the mix.

- At the end of the service, rinse and towel dry.
- Apply about 20 ml of ***Oxilock Plasma Come True N.2*** from root to tip. Comb through.
- Leave on for a minimum of 10 minutes.
- Rinse hair and continue with the most suitable Jean Paul Mynè cosmetic treatment.

Oxilock Plasma Amazing

molecular reconstruction for damaged hair

**Molecular repair booster
for use without
chemical treatments**

The amazing *Oxilock Plasma Miracle N.1* booster can be used alone, without a chemical treatment. It aids and boosts the effects, even on extremely damaged hair, repairing the fibre for longer, increasing resistance to breakage and leaving hair looking unbeatably shiny and soft.

Application
table

repair

Preparation	Application	Processing time	Application	Conclusion
Spritz hair to dampen	Apply the <i>Oxilock Plasma Miracle N.1</i> + <i>Amazing</i> cocktail in a mixing ratio of 1:1	15 minutes	Towel dry hair and apply <i>Oxilock Plasma Come True N.2</i> directly, leaving it on for 8-10 minutes	Rinse thoroughly and follow with the desired Jean Paul Mynè shampoo and treatment
