A MATTER OF SENSITIVITY

What is a sensitive scalp?

About 60% of women and 40% of men have problems related to scalp sensitivity. The symptoms of scalp sensitivity are: burning sensation, tingling, pain, itching and redness. They may be more or less acute and cause discomfort.

60%
OF WOMEN

40%
OF MEN

CAUSES OF SCALP SENSITIVITY

- *Drugs*
- *Hormonal surges*
- *Physical and emotional stress*
- *Food allergies or intolerances*
- *Atmospheric conditions like sun, heat, wind*
- *Shampoo and hair products containing strong surfactants / detergents*

When the skin's natural protective barrier is threatened by one or more of these factors, micro-inflammation of the scalp may become one of the main causes of greater sensitivity.

RESPECT AND RESPONSIBILITY.

Respect and responsibility for the environment and the health of skin and hair are the basis of this innovative PhytoActive system of 90% natural origin. Navitas is free of allergens, parabens, chemical preservatives and aggressive surfactants and contains natural preservatives which respect the environment and are gentle on the skin.

RESPECT IN SUBSTANCE.

The NAVITAS line contains a MIX OF INGREDIENTS OF NATURAL ORIGIN for soothing sensitive, irritated, delicate skin. It is rich in important ingredients that ensure the natural health of your hair in total respect of skin and scalp.

BLACK COHOSH

(Actaea racemosa)

Black cohosh is a medicinal plant used by Native Americans for its many virtues. It is known for its soothing qualities.

PATAUÀ

Native to Amazonia, it is widespread throughout Latin America. It grows in humid forests, over-flooded lands and flooded plains. Traditionally, its oil is used as a food and as a cosmetic, especially in hair care for beauty and shine.

NETTLE

(Urtica dioica)

A perennial plant very common in Italy, it belongs to the Urticaceae family. Since ancient times, it has been highly esteemed and used for many purposes. Nettle extract is characterized by a cleansing, astringent, soothing action.

BABASSU

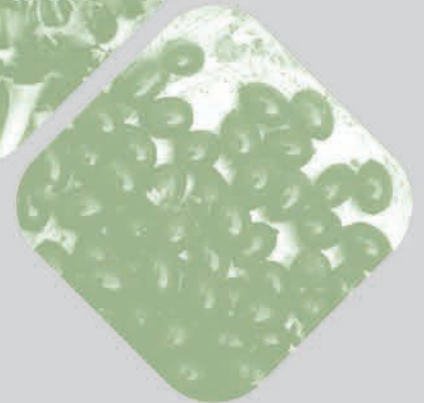

Obtained from the fruit of the Babassu palm, its oil is rich in fatty acids. Used in cosmetics for its emollient properties, it restores the skin's lipid layer, protects skin and keeps it soft and smooth. This oil makes hair soft, but with no heavy residue.

MILK THISTLE

(Silybum marianum)

Milk thistle is known for its antioxidant qualities. Thanks to its flavonoid content, it slows down the formation of free radicals, thus reducing the causes of aging.

NAVITAS

Sensitive Shampoo

This shampoo provides gentle cleansing action on the skin, but effective on the hair and respectful of the hydro-lipid balance of the scalp, thanks to the presence of Babassu oil.

The absence of aggressive surfactants and the presence of soothing plant extracts make SENSITIVE SHAMPOO ideal for anyone who suffers frequent redness of the scalp or who simply prefers gentle cleansing action that is delicate on the skin.

IN SALON: 500 ML BOTTLE
AT HOME: 250 ML BOTTLE

NAVITAS

Sensitive Conditioner

SENSITIVE CONDITIONER is rich in plant-derived amino acids, vitamin B5 and conditioning agents; it instantly moisturizes damaged hair, making it shiny and soft. Your hair will respond better after being immersed in an "amino acid bath".
